This is a fun and unique activity. One of our guides will guide you to the tower, a special place to help you to find and identify birds and other rainforest animals. During the visit to the different platforms in the tower the guide will tell you about the different levels in the forest. When you get to the top of the tower, you'll be at the tallest point (37 meters) From there you'll see the trees around which get to 30 meters tall (100 feet or more). This is an excellent place to watch the birds visiting the canopy near to your eyes. This experience is possible only from this place, it's completely different watching birds in the canopy than watching them from the floor. It's amazing to watch the colorful macaws, parrots, toucans, tramps, tanagers, jacamar, woodpeckers, monkeys and other wild jungle animals in front of your eyes.

Dinner 7: 00 PM

Caymans searching at the river: 8:00 PM

This activity is performed after dinner. To search alligators we'll go back to the river and take a boat ride where supported by our flashlight we'll look for the red reflex of the alligators' eyes that sometimes are on the banks of the river. And with more luck we could have the opportunity to see some nocturnal animal's habitat. Just being in the middle of nature is impressive and magical. This activity takes 45 minutes to one hour approximately

Parrots claylike

We'll guide you to the claylike parrots and macaws, which is located at approximately 15 minutes on a boat trip, then we'll get to a hidden place since there you we'll appreciate a ravine formed by erosion of the river in a clayey way, where every morning at dawn, different types of parrots and parakeets and other species of birds meet. They perform their flutter ceremony before starting the collpeo. Which consists of ingesting Clay from the Collpa after 20 to 25 minutes will go away. It is believed that the small particles of clay serve to detoxify fruit diets of birds Tres Chimbadas lake.

Boat trip approximately 30 minutes. After that we'll continue with the boat trip until we reach a place where we will have to walk for about 25 minutes to reach the Tres Chimbadas lake port where we will find a catamaran that we will use to make a whole trip around the lake. When we finally arrive to the destination we will have a breathtaking view of the lake, surrounded by beautiful water palm trees. Having a bit of good luck you will be able to observe a variety of wild fauna species such as Hoatzin, monkeys, macaws, black caiman, flying parrots and maybe we could observe a family of river wolf (Pteronoura brasilienses), specie that is in danger of extinction. This attraction is adjacent to the Tambopata Reserve.

In the back road we'll be near to the Parrots Clay lick that is located at the river border. In a 10 – 15 minutes stop We could maybe see some parrots and guacamayos clay licking

When we finish the trip we'll get back the lodge. And then you'll enjoy the delicious break that will be waiting for you and you'll have a break time to have a relaxing time enjoying the landscape from you room.

This activity takes approximately 2 and a half hours depending on how interesting is the day and the fauna.

Lunch 1:00 PM

"Nape" Botanical Garden – 3: 30 PM

To continue with our tour, we'll visit the medicinal garden which is located very near to the lodge. There we'll meet the ethnobotanical guide who is going to share with us some traditional knowledge of natural medicine preparation. Many people still preserve the habits of giving good use to medicinal plants such us: Ayahuasca, Chacruna, Chuchuhuasi, Cat's claw, garlic sachá and others that are used and prepared by local people specially to cure some diseases like rheumatism, colds, malaria, diabetes, fever, gastritis, cough, anemia, and more.

This activity takes approximately one and a half hour.

Bow and Arrow activity 4: 30 - 4:45 PM

Our guide will explain the way that ancient, elaborated and used the bow and arrow to hunt some animals in the area as a home maintenance activity and as a way to provide support to the couple for feeding children.

To make this activity we'll take a walk of about 30 minutes for a trail that is close to the lodge. When we get to the place we will have the opportunity to practice this fun activity. To develop this activity, a lot of concentration is needed, because it involves throwing an arrow with a bow and get the target from a distance. This activity takes between 45 minutes and 1 hour, depending on the number of people assisting in the group.

Dinner 7:00 PM

Night walk 8: 00 PM

This activity is performed after dinner. It's a night treet by one of the lodge roads looking for insects amphibians, tarantulas, bats, nocturnal birds and listening to different sounds of animals, the falling of the leaves from the trees, Which will make more interesting the route, and with some luck we will observe some nocturnal life mammals; such as armadillo, night monkey or perhaps some nocturnal bird.

### Day 16: PUERTO MALDONADO

Parrots clay lick 5: 30 AM

We'll wake up very early in the morning and with luck we'll try to see the parrots and macaws concentration or maybe some mammal near the parrot's clay lick. To develop this activity we'll trip for about 15 minutes on a boat. Since the boat we'll observe ravine formed by erosion of the river in a clay lick way, It is believed that the small particles of clay serve to detoxify fruit diets of birds and other mammals. This activity takes 20 or 25 minutes approximately. After the birds are going to start their flights around the claylike and we'll get back the lodge to have a delicious breakfast.

Breakfast 7:30 AM

Mammals claylike 8: 15 AM

To do this activity we'll have to walk for about 2 hours. The hidden place is located at 6 kilometers approximately and the time to get the lodge back is the same, there, a delicious breakfast, is going to be waiting for us.

Like the birds, mammals meet around the clay lick too. However not in the same way and not only at the same time, mammals meet around the clay lick in different times during the day or the night. They are more reserved about it and do less routine. So, they are more difficult to see, unless you sit here for 24 hours.

This Collpa is visited by the huanganas, Sajin's, deer, agouti, squirrel, tapir. You will arrive at a place where they will stop for about 30 to 45 minutes to wait for the activity of the animals to begin. But in the course of the walk the guide will explain some species of plants and hopefully they can observe some species of mammals also

Lunch 1: 00 PM

A visit to the organic fruits garden 3:30 – 4: 45 PM
